WORKSHEET #6: SIGNIFICANT FIGURES AND SCIENTIFIC NOTATION

There are at least two reasons for being familiar with scientific notation.

36

1) **Method of writing numbers that are very big and very small. It works like this:**

a big number

$$\text{Speed of light} \Rightarrow 300,000,000 \text{ m/s} = 3.0 \times 10^8 \text{ m}$$

a small number

$$\text{Charge on an electron} \Rightarrow 0.0000000000000000001602 \text{ C} = 1.602 \times 10^{-19} \text{ C}$$

2) **helpful for indicating how many significant figures are present in a number**

$$\begin{aligned} 100 \text{ cm as } & 1.00 \times 10^2 \text{ ( 3 sig fig )cm} \\ & 1.0 \times 10^2 \text{ ( 2 sig fig )cm} \\ & 1 \times 10^2 \text{ ( 1 sig fig )cm.} \end{aligned}$$
